The bulls selling here represent the top half of the bulls born in this C calf crop at Three Trees Ranch. The bulls that sell as Lots 1 through 4 have been used as herd sires at Three Trees Ranch last spring and into the summer.

On September 27, 2016, there were 47 bulls culled from this calf crop that had been castrated after a year of age that were harvested at the Cargill plant in Dodge City, Kansas. Those steers had an average live weight of 1,406 pounds and an average hot carcass weight of 882 pounds with 66% of them (31 head) qualifying for the USDA Prime and Certified Angus Beef brands. Even in the currently depressed market for fed cattle, those steers returned an average of \$1,565.74 per head.

The USDA Prime carcasses in this group earned a \$15 per hundredweight premium and that Prime/Choice spread has been running in the range of \$20 per hundred for several years now.

Three Trees Ranch believes that as the supply of fed cattle continues to grow with the growth the national beef cow herd, the packing industry will place more discounts and more pressure on cattle that do not have the marbling needed for the upper two-thirds of the USDA Choice grade that is needed to qualify for Certified Angus Beef.

When we remember that the heifer calves these 2016 sale bulls sire will likely be in production for a decade or more, how can we not focus more than ever on the genetics of marbling as an important component in these replacement heifers?

The females that are listed on the next two pages will sell as commercial females in the groupings as indicated. Those with a registration number listed can have their registration transferred to the buyer for an additional cost of \$150 per head above the bid price. A buyer of 25 or more females or a buyer of a bull and females can have females delivered free of charge. Delivery of all other females by Three Trees Ranch will be invoiced at \$50 per head.
